

- 1 Cover
- 3 Molding

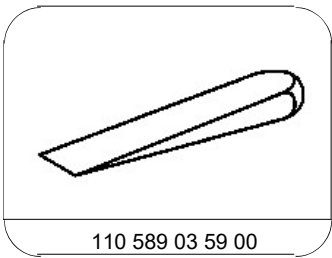

P77.20-2358-01

P77.20-2360-07

- 1 Cover
- 2 Sliders

	Removing		
1	Open tilting/sliding roof		
2	Pry paneling (1) off of tilting/sliding roof		*110589035900
3	Pull paneling (1) out of vehicle toward front		
	Install		
4	Position sliders (2) horizontally at tilting brackets		
5	Insert paneling (1) into roof cutout		
6	Slide guide sleeve at rear part of paneling (1) onto guide pins on roof cutout		
7	Slide paneling (1) toward rear to stop		Carefully slide paneling (1). The side moldings (3) can stick in the sliders (2) and be damaged.
8	Clip paneling (1) into titling/sliding roof		Replace damaged clip bottom sections.
9	Position tilting/sliding roof half way to pop-up position		Carefully move tilting/sliding roof to pop-up position. The side moldings (3) can stick and moldings (3) can be damaged during the tilting procedure.
	Checking		
10	Check tilting/sliding roof for proper function
